SCAW/R1 (2021)	RELEASED	<div></div>	07/Jan/21	01/Jun/21
R2 (2021)	RELEASED	<div></div>		30/Jul/21
2.0	RELEASED	<div></div>		
R1 (2021)	RELEASED	<div></div>	01/Jan/21	15/Apr/21

## Version Scheme Proposition

- The naming scheme is based on change significance.
- Each level in the numbering scheme identifies a decreasingly smaller significance of change to a release.
- The 1<sup>st</sup> 2 levels are code changes per the release process.

Major version  
Pack of new features

3.3.0.1587

Minor version  
Requested features

Bug Fix / Configuration Change  
(optional)

Revision  
Unique incremental number or Build Number

## MIGRATION RETROSPECTIVE

### What went well?

- Only found two small issues related to data and were fixed quickly during hypercare
- Artifacts, users, etc were all migrated well with out any major issues.
- Boards and Dashboards were re-created
- Good and clear communication to The Academy team.

### What could have gone better?

- Not all stories coming through into sprint
- Query should have been verified by all team members to assure it's accurate (both OUS DevOps and BEA)
- More team members offering lab to assure all issues are identified early in lab; further consistency with same people offering lab and production UAT
- Need to either increase capacity for import or well developed plan related to batches or less issues.

### Action Items?

- Additional Jira/Confluence training - follow up with Michele
- Action: Sharad** to identify additional training needs and set up a short 30 min session with the team.
- Additional training on the Workflows to assure it is fully understand by team
- Identify custom fields - clear on mapping
- JQL training
