

# DevOps Proposal for 2022

## DevOps - Stage #1

- Tools except Azure Pipeline
- Each tool with evaluation of cost
  - Tosca (Training own team vs/ vendor already trained)
    - 5-10 test cases initial set up of \$ XXXX
    - 10-20 test cases cost of \$ XXXX
  - Jira (migration vs/ Set Up)
  - Azure Repo
  - Dynatrace
  - Splunk
- But staying with Kneat and Snow for documentation

## DevOps - Stage #2

- Agile training
  - Training or levels of coaching
- But staying with Kneat and Snow for documentation

## DevOps - Stage #3 (POM)

- SQA Review Board approval
- SLC to DevOps policy for documentation
- Document in Confluence instead of SNow
- DevOps pipeline with Azure
