

KT Documentation - OneCRM DevOps Implementation by OUS DevOps Team.

Document Summary

IN PROGRESS

Project Name: OneCRM - KT Documentation

Product Owner: [Michaud, Nicolas](#)

Technical Lead: [Ks, Sachin](#)

Preface

PREFACE

OUS-DevOps team is working on implementation of DevOps design for OneCRM. This document folder consists of different aspects of the design that is implemented.

This serves the purpose of comprising all information about the implementation and thus becoming a Reference point or Knowledge transfer document for the OneCRM Salesforce Release Management team.

This page showcases the Overall Architecture diagram, that will be show the latest state of functioning. The sub page directory will have the following information

1. SCA design with SonarQube/CodeScan
2. Deployment Automations
3. Explanation of Integration to Azure-DevOps Pipeline Job and Tosca Automated testing process
