

MuleSoft Production API - Monitoring

Here are the two PROD endpoints for Dynatrace:

- Public API:
 - API URL: <https://api-bts.abbvie.com/dqm-eapi/v1/api/healthcheck>
 - Auth policy: OAuth 2.0 - Bearer token in the headers
 - ClientId/Secret: Shared separately
 - Curl Format: `curl -X GET \`
`https://api-bts.abbvie.com/dqm-eapi/v1/api/healthcheck \`
`-H 'Authorization: Bearer <token>'`
- Private API
 - API URL: <https://api-bts-private.abbvie.com/abbvieid-papi/v1/api/healthcheck>
 - Auth policy: ClientId Enforcement - client_id and client_secret token in the headers
 - ClientId/Secret: Shared separately
 - Curl Format: `curl -X GET \`
`https://api-bts-private.abbvie.com/abbvieid-papi/v1/api/healthcheck \`
`-H 'client_id: <client_id>' \`
`-H 'client_secret: <client_secret>'`
