Team	Using Jira already?	Team Members Count	Number of Issues Foreseen	Agile Proficiency?	
OUS-IFT-Integration					
OUS-Digital-Integration					
OUS-MDM-Integration					
OUS-Fusion-Integration					
OUS-PSP-Integration					
OUS-AdHoc-Integration					
OUS-PSP-Migration					

Best Practices:

- Less Jira projects as possible
- Same Issue Types / Same Workflow / Same Custom Fields can be merged in one project
- Use component per team
- Board per team
- Standardize Cadence
- Sprint

Next Steps

- Request DnA Project to Enterprise DevOps (+ Confluence Space) + Give access to Sharad/Tomas/Katie + Create Sample Data
- Sharad to talk to Autumn vs. switch to DnA Project and standard stories from Enterprise
- DnA Project Setup and Way of Working (Components, Target Release, Scrum of scrums, Other ceremonies, etc)
- Intake Project Details (Issue Type, Workflow, Custom Fields?)
- Intake to Initiative/Story Flow? (Epic Cloner / Automation for Jira)
- Missing Custom Fields vs. Enterprise Standards (OneCRM)
- Workflow alterations vs. Enterprise Standards (OneCRM)
- Sprint with stories bleeding on the next one (move? clone? how to handle?)
- Setup Test Data in Projects (Intake and Teams)
- Setup WoW with Advanced Roadmap
