

How to onboard new members to Azure DevOps?

Step-by-step guide

- 1. Join an Organization:
 - a. Once you have an account (511 ID), you'll need to join an Abbvie Azure DevOps organization (**abbvie-devops-lab**).
 - b. As an OUS DevOps Team, we manage OUS Repositories under **Abbvie BTS** Project.
- 2. Get Permissions:
 - a. To access **Abbvie BTS** project, you need to create and [Access Request](#) through Service NOW tool.

* Request Type

Add/Modify

* Environment ?

✕ Production

* Capabilities Requested ?

✕ Source Code Management

Business Application(s)

Additional Comments

Add me to "Abbvie BTS" project under Abbvie Azure DevOps Organization and provide me "Basic" level access.
