

Migration from AWS to Abbvie server

Plan Type:

Data Migration: Migration of Common Repository from AWS server to Abbvie server.

Assumptions and Constraints:

- Resources will be required from Automation Team in order to adhere to the project schedule.
- Resources will have Tosca 15 installed.
- DEX configurations will be available.

Project Organization:

Area/Name	Responsibility
Job Title	

Migration Approach:

Parallel Testing: Validation of Repository in new server in parallel with the repository in existing repository.

Benefits:

- Common Repository will be available in Abbvie network.
- Latency will be reduced while synchronizing the workspace.
