

Prerequisite

Connection Strings

Workspace should be created for AWS and Abbvie repositories and access should be granted. Below are the connection strings for respective repos.

AWS Connection String:

031139008000000000000000004000011078045042075045178053053210051052213051052049208051052183180118073044073076074044078181013201047070878180014205076129176092156172003202161108067035099019069107000174185026179063000000000

Abbvie Connection String:

<TBD>

User Management:

All the engineers and managers are required to be available under User Management to be able to access the workspace for migration and supervision.
